

# TEST CERTIFICATE

T.-Cert.-No.: 2010.08.20

## **alkitorc® NOVA multibox**

### **Approval for use in crane transport or crane suspension**

The crane transport resp. the crane suspension has to be carried out by using the side crane eyelets exclusively.

Transport accessories like cords, ropes, loops, chains, hanging hoes etc. have to be paid out for a load of min. 150 kg. In building sites the hanging hoes have to be equipped with a safety device.

### **Test**

The **alkitorc NOVA MULTIBOX** including an **alkitorc NOVA** Hydraulic Pump and a static load were hanged to the crane eyelets middles a quadruple hanging device (see below - left picture).

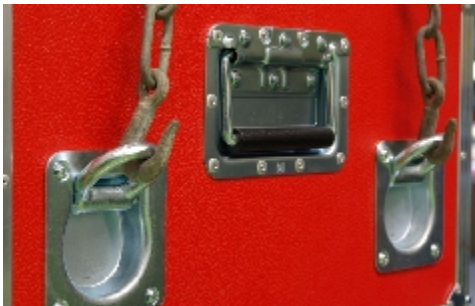

Test-load:	150 kg (triple nominal load)
Period:	24 hours
Ambient temperature:	23°C
Place:	production hall of alki-TECHNIK
Date:	19.08.2010

### **Test procedure**

according

**DIN EN 13155:2009-08 / EN 13155:2003+A2:2009 (D)**
